

HWD – FLOOD SWING GATE

HWD - WATERWERENDE POORT

CHARACTERISTICS

The HWD flood swing gate is a straightforward and efficient solution to protect your building from floods.

This very robust flood gate meets the highest technical standards and is available in any RAL colour.

The gate can also be used as a primary barrier in doorways. In case of imminent flooding, the gate can be quickly operated by a single person.

- Gate / door : aluminium
- Frame : INOX 304 or GALVA

APPLICATIONS

- Residential and commercial buildings, doorways, tunnel, garages.
- Openings up to 5 meters.
- To be installed in new or existing buildings.
- Opens and closes like a normal gate or door.
- This system can stop water from both sides.

BENEFITS

- Opening and closing of the gate is similar to a standard door.
- The system retains water from both sides.
- User-friendly: easy to operate by one person.
- Fast and easy.
